

## **NULL SUBJECTS IN BP AND EP ACQUISITION AS SECOND LANGUAGES**

*Ernani Machado Garrão Neto*

[ernanigarrao@terra.com.br](mailto:ernanigarrao@terra.com.br)

This research focused on the overt and the null subject regarding the acquisition of both Brazilian and European Portuguese as second languages by adult speakers who had English as their native language. We took this path in order to find evidences concerning some factors which might contribute to shaping interlanguage grammar, such as access/non-access to Universal Grammar as well as learners' native language influence throughout acquisition process.
